April 1982

## Stockner, Yeary gain top positions in CAMRON

By CPT Lawrence M. Fuccella

The 192TFG Commander has announced that LTC James F. Stockner has assumed the position of Deputy commander of Maintenance, and CPT Harold T. Yeary has become the Maintenance Squadron Commander. Both changes were effective 16 February 1982.

LTC Stockner's career started in October 1950 when he joined the unit and was assigned to the munitions area. After serving 16 months of active duty and working on F47 type aircraft, Stockner was released and reenlisted when the unit was reorganized in 1953. A year later, he was hired as a technician and put on flying status as an engineer until the coming of the F84s. During the '60s, he was assigned to maintenance control and was later appointed Fire Control Shop Supervisor.

LTC Stockner was commissioned in September 1971 when the 192TFG converted to F105 aircraft. Since then, he has held the positions of Avionics Officer, Maintenance Control Officer and Maintenance Squadron Commander.

Yeary, a veteran of 16 years in the VaANG, was commissioned in 1978 as the Organizational Maintenance Officer after completing the Academy of Military Science. His prior service time as an enlisted member was highlighted by his selection of Recruiter of the Year for 1977 by the Richmond Chapter of the Air Force Association in addition to being cited for meritorious

achievements in the recruiting area for a period of two years. He was awarded the State Bronze Star for his efforts.

A native of Lee County, Va., now residing in Glen Allen, Yeary has been a stabilizing force in achieving a smooth transition of weapon systems.

"We have taken a big step over the past year," said Yeary. He smiled as another readied aircraft rolled out of the hangar.

## UTA notes

There will be a mobility exercise on Saturday, 3 April 1982. All squadron mobility officers and other key personnel or their alternate should be in the Air Passenger Terminal NLT 0810 for the Concept Briefing which will begin promptly at 0815.

All unit members eligible for BAQ with dependents while performing active duty must recertify their financial records with Accounting & Finance prior to Annual Field Training. This may be accomplished during the April and May UTAs.

Civil Engineering has an opening for AFSC 70250. Interested members should contact LTC Valdrighi, Ext. 362.

Fatigues will be the uniform for each UTA in April and May. In addition, fatigues are required for the ORI exercise.

## Assistance Fund off to slow start; goal anticipated

The 1982 fund raising campaign for the Air Force Assistance Fund (AFAF) began on 1 March 1982 and, for the Air National Guard, will continue through 1 June 1982. The theme this year is "Commitment to Caring: An Air Force Family Affair". The Air Force goal is \$3.65 million. The VaANG has not set a monetary goal, but hopes to have at least 90% participation from its members. During the month of March, twenty-four percent of all VaANG members gave something to the campaign. Although off to a slow start in March because of mobility and disaster preparedness exercises, the April and May UTAs should provide ample opportunity to reach the 90% AFAF participation goal.

Major General John B. Conaway, Director of the Air National Guard, in a letter to all ANG members, noted that ANG support of this extremely worthy effort continues to increase due, in part, to the role AFAF is now playing in ANG members' lives. He quoted recent figures that showed that about 25% of all student loan applicants were ANG or AFRes members who have received a total of about five million dollars in loans. He urged each ANG member to make a contribution this year to affiliates of AFAF. The affiliates are the Air Force Aid Society, the Air Force Village and the Air Force Enlisted Men's Widows and Dependents Home.

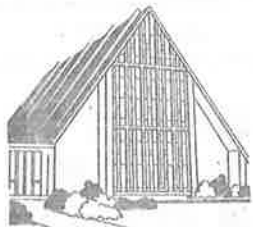

One affiliate, the AF Aid Society (AFAS), is currently working on realigning and expanding the eligibility requirements and categories of emergency financial assistance available to ANG members. These changes will probably be in effect within the next 12 months. AFAS already provides student loan assistance to ANG spouses and children as well as to the ANG members themselves.

VaANG members who want to contribute, but who have not yet been contacted by an AFAF worker, can do so by contacting their unit's AFAF Project Officer. If no Project Officer has been appointed, they can see unit commanders. The following units

## Sunday Services

Sunday 0830 - General Protestant  
0915 - Mormon  
1300 - Catholic Mass

Your Chaplain is available to you and your family 24 hours a day. Do not hesitate to call him if you think he can help or assist you in any way. His telephone numbers are: "A"-389, "C"-66, or 737-0635 (Home) and 737-1527 (Church).

### FULL COMMITMENT

Lord Chesterfield, an English statesman and writer, said, "Whatever is worth doing at all is worth doing well". This observation carries profound wisdom. This wisdom must be shared again with all people, for it seems that many individuals are willing to perform their work in a half-hearted or slipshod way.

When we do sloppy, half-hearted work we basically tell others two things:

**\*\*We do not care about the work.** This results in deterioration of the product and others will suffer the consequences of our lack of concern and our irresponsible behavior.

**\*\*We do not care about ourselves.** This is the most important factor; that it is ourselves, our own pride, that we do not care about. We lose self-respect and accept failure as a way of life. And when we lose self-respect, we lose everything. Everytime we do sloppy half-hearted work, we do a disservice to our organization, but most of all, we damage ourselves.

A person with any sense of pride and dignity will always try their best. We owe it to our own self-respect to do the best we can. This attitude will allow us to walk with our heads up and our chests out.

Full commitment or doing our job well is the call of the hour. Let us show our sense of responsibility and self-respect by performing our tasks and discharging our duties well.

## Social Actions offers direction in three areas

By CPT Andrew Willis

The Social Actions Office has the responsibility to teach three classes to be consistent with training requirements. We teach SUBSTANCE ABUSE EDUCATION, SOCIAL ACTIONS ORIENTATION, and HUMAN RELATIONS EDUCATION. Questions arise about what areas are covered in each class. To help base personnel understand these classes, a description of each follows:

**SUBSTANCE ABUSE EDUCATION** - This class is offered on a continuous basis. All persons are to attend. Once the entire group has gone through the class, we start over. The training is designed to help base personnel understand the effects of drugs and alcohol on the individual Air Guard member. Presentations are made to encourage Air Guard people to think about the prevention of substance abuse. Illustrations are given that show how abuse of drugs and alcohol relates to the maintenance of Air Force standards. Air National Guard policy on alcohol and drugs is presented and discussed. Individuals are encouraged to enter discussions. Class participations learn about their responsibilities in the prevention of alcohol and drug abuse.

**SOCIAL ACTIONS ORIENTATION** - All Air National Guard members are to attend this class. Once all members have gone through this class, only the newly gained guardspeople will come to this class. This class is designed to give members information that helps to facilitate positive human relations on the base. The base level Affirmative Action Plan is presented and discussed. Social Actions personnel discuss why the plan was developed, what the plan is to accomplish and how each person fits in with plan implementation. There is a discussion of the complaint process guard members should follow if they have a need to file a complaint of discrimination.

**HUMAN RELATIONS EDUCATION** - The Human Relations class is offered to each supervisor, E-4 and above. After each member goes through the class, that member will not attend

class again until three years have passed. The class is designed to inform supervisors about the human relations climate on base and how they have the primary responsibility to set the climate that promotes positive human relations. The supervisor receives information about values, prejudices, and discriminatory practices that create people problems. There is discussion about the communication process and about factors that act as barriers to effective communication. Attention is given to some things supervisors can do to improve the base human relations climate and to assure equal opportunity and treatment for all members of the Virginia Air National Guard. For further information telephone me at extension 435.

## ORI is coming! What does that mean?

I hope it doesn't come as any great surprise to anyone at this stage of the game that we are programmed for an Operational Readiness Inspection during Annual Field Training.

Two of our goals have been set for some time now. They are, declaring operational status and then demonstrating to the 9th Air Force ORI Team by our performance that we are a "top unit". However, the question runs deeper than just, "can we pack up and deploy from home station and operate shortly after arrival at a deployment site?" We have got to demonstrate our ability to move and reestablish operational capabilities, and continue to operate under adverse conditions, while "following the regular AF requirements." NOW THAT IS THE CHALLENGE!

Without a doubt we will show, by this unit's esprit de corps, professional appearance and enthusiasm, that we approach this inspection with a certain zeal to excel, by meeting and then exceeding the established performance standards set by Air Force. In order to accomplish this, and come out on the other side of the inspection with the rating that we deserve, each individual must review their personal and unit responsibilities.

The inspection will challenge this unit's ability to deploy; respond to disaster; personal appearance; military courtesies; base appearance; administrative and security procedures and practices; generate and fly combat sorties; and command and control functions. I am confident that if we work hard to prepare for this inspection we'll do well, and the 9th AF Inspection Team will reward us accordingly.

## 169TFG first ANG unit to receive F-16s

WASHINGTON (AFNS) -- The first Air National Guard unit to receive the F-16 Fighting Falcon will be the 169th Tactical Fighter Group, McEntire ANGB, S.C. This is part of the Air Force effort to provide the Guard with the same sophisticated equipment used by the regular Air Force.

Conversion is scheduled for late fiscal 1983. The A-7 Corsair aircraft now being flown by the 169th TFG will be sent to other Air National Guard units.

"This is the latest example of continuing Air Force efforts to include the Air Guard as a partner in the total force," Maj. Gen. John B. Conaway, Air National Guard director, said.

| 10-WEA | -                 | -            | -                  |
| 10-WSS | -                 | -            | -                  |
| TOTAL  | \$2.19            | 235          | \$515.38           |

"Force modernization increases the Guard's capabilities to perform the federal mission of providing trained, well-equipped units which can be called to the defense of our nation in the event of national emergency or war.

"During the past five years, 85 percent of our Air National Guard units have been modernized with newer, more modern equipment, including direct-from-the-factory A-7s, A-10s and C-130s. This announcement continues that exciting, significant trend," General Conaway said.

## ENLISTMENTS

The following personnel were enlisted into the Virginia Air National Guard during the month of March.

149TH TACTICAL FIGHTER SQUADRON  
TSG DUTTON, LEVIN P. III

192D CAMRON  
SSG DEAN, LEONARD P. JR.

SGT ROBERTS, MARK S.

READ

# UTA

April 3-4

## FATIGUES

to be worn  
both days

## Schools to observe weight watchers

All Air Guard personnel who will be attending Air Force Technical Training Schools after 15 Apr 82 will be required to meet the revised weight standards as prescribed in AFR 35-11, dated 28 Jul 81.

ANG personnel who do not meet the revised weight standards should be entered into the Weight Control Program prior to arrival at the AF Tech School.

Personnel arriving at Technical School who are overweight by the revised standards prescribed in AFR 35-11 and not enrolled in the formal Weight Control Program will not be entered in school but will be returned to their home unit.

## Your magic retirement numbers: 20, 8 and 60

This year, in a series of Washington Ticker articles, we're examining your National Guard Federal Retirement Benefits. These articles will seem a lot more pertinent if you know when and if you're eligible for benefits, so we're going to start by letting you figure out your eligibility. It's as easy as 20-8-60.

- 20 - Have you completed 20 years of qualifying military service?
- 8 - Have you served the last eight of those years in a Guard or Reserve unit?
- 60 - Are you 60 years of age or more?

If you can answer yes to all three of these questions, you're eligible for all kinds of National Guard Retirement Benefits. You can collect retirement pay, survivor benefits, medical care benefits. You can use military installation facilities and fly on the Space Available travel plan.

We'll be delving into each aspect of your retirement benefits in detail this year. We'll show you how to figure out exactly what benefits are due you and how to collect them. This month, we're focusing on one of the benefits you're likely to get the most enjoyment out of, use of military installation facilities.

156 FEDERAL INCOME TAX

## Savannah wants to know

Most of us will be deploying to Travis Field in Savannah, Ga., at the end of May for Annual Field Training. During that two-week tour, the Public Affairs office will attempt to get the 192d Tactical Fighter Group as much exposure as possible on Savannah-area radio and television stations and in the newspapers there.

News reporters are always interested in writing stories about unusual activities and unusual people. The Public Affairs office knows of some people in the unit with unusual hobbies, but we are looking for more.

If you are involved in an activity which you think may be newsworthy, and expect to pursue that activity in Savannah, contact either Maj Frank McNally or SSG Lou Paris at extension 388.

Your Retired I.D. card gives you access to military installation facilities anywhere in the world. It puts a wealth of services and goods at your fingertips. You and your spouse are eligible to patronize commissary stores, post exchanges, clothing sales stores, dry cleaning facilities, theaters, recreation facilities, officer clubs, guesthouse accommodations and beverage (class VI) stores.

Availability of space, goods and services should pose few problems in the United States. If you travel overseas, though, you're likely to find your access somewhat more limited. Medical care at U.S. facilities is a prime example. You're allowed to use the facilities anywhere you go, of course. But, they're organized on a space-available basis, and active duty personnel have first priority.

Also, as a retiree, you may not be eligible overseas for the same duty-free purchases and services as an active duty soldier. That's up to the individual country though, so check ahead.

Actually, conditions are under constant review and are subject to change without notice, so it pays to check with overseas commanders ahead of time to see what facilities are available.

## Student loan advisory

The Federal Government is still in the process of establishing guidelines for the 1982-1983 Guaranteed Student Loan Program. Therefore, the Air Force Aid Society is delayed in making the necessary revisions to the Henry H. Arnold and George S. Brown application forms and brochures for the 1982-1983 programs.

Until the new forms can be printed the following schedule will be complied with by the Air Force Aid Society in processing applications:

A. For 1981-1982 School Year: An application will be accepted for processing if a minimum of 100 days remains on the loan period requested.

B. For 1982-1983 School Year: An application for a loan period beginning after 30 June 1982 will not be processed since the application form is obsolete.

It is anticipated that application forms for the 1982-1983 school year will be distributed to the field by mid-May.

# OPSEC Update

By LTC George Davis

Now that nearly all (954) unit personnel have successfully passed the OPSEC testing program, which began last fall, it is time to consider the real meaning of this form of training. Realizing that many individuals assigned to the unit do not work with classified materials on a daily basis, it is important to remember that the enemy is interested in all areas of our operations, both classified and unclassified. The testing is only one method to keep all personnel informed in order for them to be able to effectively perform their assigned tasks and also utilize the proper OPSEC procedures. A strong OPSEC program requires the knowledge and support of every individual assigned to this unit. One person's carelessness or lack of knowledge, concerning OPSEC procedures, can go a long way in negating the efforts of the entire unit. This may sound like a strong statement; it is meant to be, because it is true.

It is no secret that the enemy is vitally interested in ALL aspects of our operations. Whether or not you choose to believe this is up to you. In order to find out, you can do one of two things. First, you can accept as factual the information furnished by the unit OPSEC program. Second, and probably better, you can do some homework of your own. Either way,

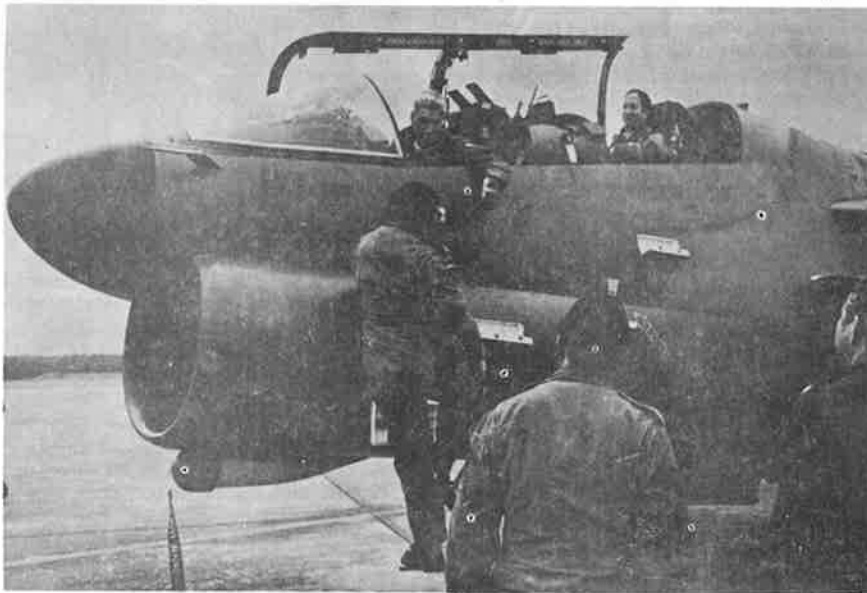

you will discover that the enemy does in fact expend vast amounts of money and resources to maintain an extensive network to monitor our activities.

This month is an ideal time to really look at how you utilize your OPSEC training. First, we have almost completed our conversion in the A-7D program. This is certain to mean more tasking and additional unit requirements. Second, during this month's UTA, we will have a mini ORI. This is an ideal time to

look at how you can implement these areas of the OPSEC program, to which you have been exposed. Finally, how we perform during the up-coming ORI, will be noted by both the 9 AF IG Team and also our constant companion. Let's show both parties how a real professional team operates.

## OPSEC TIPS TO CONSIDER

1. Realize the consequences of compromise of national security.
2. Set a good example by motivating others to practice sound OPSEC procedures.
3. Interfere with enemy data collection by considering ALL transmissions as being monitored by unfriendly forces.
4. Don't compromise the defense effort by "talking around" sensitive information.
5. Don't improvise voice codes. Use assigned and authorized code systems, nicknames, or call signs.

LTC "Tee" Coke (front seat) and Cpt Don Everett prepare to deplane after ferrying the unit's first A7K from Vought's Corporation assembly line in Dallas. The aircraft will be primarily used for crew instrument checks and upgrading, but can also be utilized in the same role as the A7D. LTC Stockner, MSG Monger and other maintenance personnel form part of the reception committee that welcomed the new arrival to Byrd Field.

# Military education essential for officers

The professional military education (PME) of its officers is vital to the continued success of the Air National Guard. This was the sentiment of Col Richard E. Moss, Chief of the Office of Training, National Guard Bureau, as he announced FY 83 PME schedules to the Adjutants General of all states, territories and the District of Columbia in an ANG-CS/TET letter dated 25 Feb 1982.

PME can be completed either in residence or by correspondence. The best way, because of the interaction of students, is the residence course. Students from all branches of U.S. and of some allied services usually attend residence courses.

The FY 83 PME residence schedule is as follows:

August 1983 - May 1984:

National War College  
Industrial College of the Armed Forces  
Air War College  
Army War College

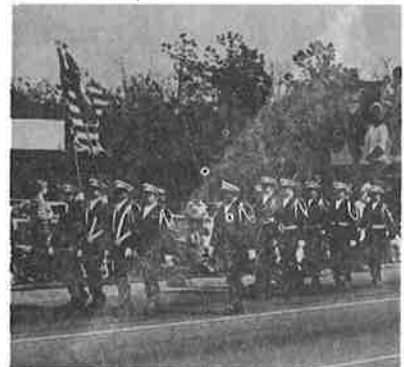

August 1983 - June 1984:

Air Command and Staff College  
Armed Forces Staff College  
Squadron Officers School:

83A 19 Oct 82 - 17 Dec 82  
83B 8 Jan 83 - 4 Mar 83  
83C 16 Mar 83 - 12 May 83  
83D 24 May 83 - 22 Jul 83  
83D 16 Aug 83 - 7 Oct 83

Applications for Squadron Officer School should arrive at ANGSC/TET not later than 90 days prior to the school/start date. Applications for all the other courses must be at the office of the Chief of Staff, Headquarters, Virginia Air National Guard, not later than 15 Jul 1982.

For information on the prerequisites and how to apply, VaANG officers should contact MSG David M. Gates in the CBPO, or call him on extension 310.

The 192TFG Color Guard and Rifle Squad show fine form while participating in the St Patrick's day Parade held in Richmond on 14 March 1982.

## Security Police role important during ORI

By TSG James W. Stanley

**SECURITY:** This information is provided for all 192TFG personnel in order to give each of you a better understanding of the security mission during the upcoming ORI.

TAC-gained Security Police units are required to demonstrate the ability to secure and protect all AF resources within a restricted aircraft parking area on the flightline. This means that the 192d Weapons System Security Flight must provide priority "B" protection for assigned aircraft during Annual Field Training/Operational Readiness Inspection.

Priority "B" Security Protection requires that the Security Police be posted on Entry Control Points and the marked boundaries of the restricted area. It also requires that a two-man Security Patrol (Alarm Response Team) be posted to patrol inside the restricted area boundaries. All these posts must be controlled by the Central Security Control (CSC). Because of the requirements, everyone who enters the restricted area must have a valid restricted area badge (AF Form 11996) or be escorted by someone who has a badge and is designated as an escort official.

During the ORI the IG Team will simulate security exercises which will consist of:

1. Unauthorized persons in the restricted area.
2. Unidentified object on an aircraft.
3. Bomb threats.
4. Enemy aircraft strafing the flightline.
5. Sniper attacks.
6. Terrorist attacks against the base.
7. etc.

## 'Rebel Road Runners'

Members of the VaANG, interested in jogging, have formalized their interest into the "Rebel Road Runners" race team. The primary objectives of the team are to promote fellowship, good health, and physical fitness of unit members through walking, jogging, and distance running. The team will participate in events, such as local runs, to further the positive image of a fit and able fighting force. Also, the team will provide an avenue for those who have a weight problem to do something about it. All unit members are eligible to join and because the team is self-supporting, there are no dues. Contact MSgt Brooks, ext. 318, if you would like to join.

We solicit the cooperation from each and everyone for successful completion of the ORI. Anyone encountering security problems should discuss these problems with Major Schwartz, OCI WSSF or MSgt Desper, Security Superintendent.

Remember, be security conscious of personnel inside the area or approaching the restricted area at locations other than an Entry Control Point.

**VEHICLE REGISTRATIONS.** All Vehicles Registration on DD Form 2220 are due NLT 1 Jan 83. All personnel who's vehicle is not registered through Security Police Pass and Registration Section after this date will not be allowed entry onto the installation.

\*\*\*\*\*

**ATTENTION ALL SECURITY POLICE PERSONNEL:** Those Security Police personnel who are not attending Annual Field Training at Lackland AFB are to report for the regularly scheduled UTA on 3 and 4 April 82.

## Enlisted Association to hold annual conference

The Virginia Air National Guard will host the annual meeting of the Virginia Army/Air National Guard Enlisted Association, 23-25 April. The meeting will be held at the Holiday Inn, 3200 W. Broad Street, Richmond, Va. Registration will be on Friday, 23 April. Plans have been made to include everyone: buf-

fets—dances—tours. Contact CMS Robert V. Glenn, 257-0012 for more information and reservations. Come on ladies, we need your support too—call Frances Germain, Ladies Auxillary, 795-1276 for tour information.

Mark your calendar **NOW** and plan to attend for a fun filled and informative weekend.

# SPRING

Keep building  
your retirement  
benefits.

## Wood to retire

Mr. Wilbur N. Wood Jr, Civilian Security Policeman with the Virginia Air National Guard for eight years, will retire effective 30 April 1982. Prior to employment with the VaANG, Mr. Wood held several positions designing and preparing window displays for various companies in the local area and Florida.

Mr. Wood is no novice to the military. He began a military career in 1940 with the Army National Guard. His unit was activated during World War II on 3 February 1941. His initial assignment was with "B" Company, 116th Infantry. Mr. Wood received a commission as a Second Lieutenant in July 1942 and served 3 years, 8 days of combat duty in North Africa and Sicily. His guard unit was released from active duty

in 1946 and he served in the reserves for two years until reactivation of the Richmond Howitzers (Army National Guard) in 1948. Mr. Wood served in the Army Guard, reaching the grade of Major, until his retirement in April 1969.

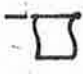

Future plans include a life of leisure and continuing with his art work. Mr. Wood has been involved in oil and water color painting and pen and ink drawings in the local area for the past 16 years.

We, the members of the Virginia Air National Guard would like to take this opportunity to express our appreciation for a job well done and wish you the very best in the future.

His dedication to the civilian security guard force will be greatly missed.

# STANDARD ALARM SIGNALS

ALL ATTACKS WILL BE CONSIDERED TO INCLUDE CHEMICALS UNTIL PROVEN OTHERWISE
